One of the latest applications was from a Vermont farmer, who sent a mass of remnants of bills that approached the condition of pulp, and asked for \$280 in return, which, after some delay he recoived. He said he had very carefully hidden the money under the rafters of his barn, and somehow it had gotten into the hay and bran fed to one of his cows. The cow was chewing the green feed when its nature was discovered.

Another farmer, from Kansas, has sent a lot of chopped bills that he says represent \$10 According to his story they were in the pocket of a vest that was hung on a feed cutter, and when being operated the corner of the vest that held the money got between the knives, and, with the money, was tors in shreds. Got the Watch.

A Camden lawyer put up a bluff suc cessfully not long ago. A client came to him and explained that a young man had bought a watch from him on the installment plan. He made one payment, gave the watch to a young lady and skipped out. The client wanted to know if he could recover the watch from the young lady. The lawyer said that he could not without spending more money than the watch was worth, except the young woman could be bluffed. The client said a bluff would be paid for if successful, and the lawyer posted the following letter:

"Dear Madam-The watch recently esented to you by Mr. Blank was ob sined surreptitiously from the establishment of my client, and unless it is returned by next Tuesday morning I will be obliged to, very reluctantly, dispatch a judicial functionary to your residence with process."

The watch was delivered the following morning and the lawyer received a fine gold chain for writing the letter .- Pitts-

The Sponge Animal.

If the sponge as brought up fresh from the sea bottom were a familiar object, says Dr. Ledekker, few would be in doubt as to its being an animal. When fresh, it is a fleshly looking substance covered with a firm skin, and if cut it presents somewhat the appearance of raw meat. Its cavities are filled with a gelatinous substance called "milk." American sponges, and those of all other parts of the world, are inferior to the sponges of the eastern shores of the Mediterranean. The finest of all sponges is the Turkey tollet sponge, which is cup shaped. Ring Corn is Marching On.

The sale of July corn in the Chicago market for nearly 43 cents attracted attention and comment. The lowest figure has November was 30% cents. It is the highest price in five years, and a remarkable price in the face of the largest cropever harvested, following two good crops. In September, 1896, corn was a low as 10% cents. The present price, in the face of the large crops, is due to the fact that corn is dominating the markets as a brendstuff which has been held exclusively by wheat for years. The export since July 1 has been 155,000,000 busheds, in spite of their their unusual cheap ness of wheat. Corn has always been the crop in the corn belt and it has been the corn in the return belt and it has been of wheat. Story of a Salve. To be bound hand and foot for years by the chains of disease is the worst form of slavery. George D. Williams, of Manchester, Mich., tells how such a slave was made free. He says: "My wife has could not turn over in bed alone. After using two bottles of Electric Bitters, she is wonderfully improved and able to do her own work." This supreme remedy for female diseases quickly cures nervousness, sleeplessness, melancholy, headache, backache, fainting and dizzy spells. This miracle working medicine is a godsend to weak, sickly, run down people. Every bottle guaranteed. Only 50 cents. Sold by Clark O. Proud, Oregon, Mo.,

and G. Meyer, New Point, Mo.
